This list contains a small number of items which we have selected from our current inventory. Recently, we purchased an extensive collection of Bust and Seated coinage along with several other smaller collections. The Bust collections were mostly complete in terms of dates and major varieties while the Seated collections were virtually complete date and mintmark sets from Half Dimes through Dollars. While many items from these collections have been sold, we still have a large number of the tough dates left in stock. If you are collecting these coins we hope you will note our show schedule and come out to see us.

MAIL ORDER POLICY:

A word about ANACS:

The American Numismatic Association Certification Service is numismatic's latest entry in the "slab" market offering third-party independent grading of coins and placing these coins in sonically sealed plastic holders. The Collector's Cabinet is an official ANACS submission center and can offer the complete line of ANACS services. Along with the sealed "slab," ANACS still offers their photo-certificate for authentication and grading. The difference that stands out in our view is that, with ANACS, you still get a photo-certificate even if your coin is not placed in the sealed holder. This is important for those coins which have problems and may not be graded by the other services (PCGS and NGC). The cost for Coins submitted to ANACS is $23.00 plus postage costs for their regular service which may take up to 8 weeks. This cost is the same for the photo-certificate and "slab" options. Also, various levels of express service are offered at increased cost. If you would like more information about all of the ANACS services, please send a Self-addressed stamped envelope and we will be happy to send you additional information.

Colonials:

1724 Hibernia Halfpence, MS-63, Ex Norweb lot# 3495. Variety without stops. Very attractive red and brown with some minor weakness in the central design. Certainly a candidate for a premium set of colonials. $1975.00

1783 Washington, Draped Bust, Proof Restrike with Plain edge. Proof-60+. Struck circa 1851. Our research indicates that engrailed edge examples outnumber the plain edge pieces by about 10 to 1. This specimen exhibits a very attractive, reflective dark brown color with choice, problem free surfaces. $485.00

1787 Connecticut, M-33.34-Z.11, R-6. VG-8. The obverse exhibits details of Fine and is quite well centered. The reverse is weaker with the entire surface showing a very faint roughness. An opportunity for the variety collector. $145.00

Dear Mr. Tettenhorst,

It was a privilege meeting you at the ANA convention in Atlanta and also receiving your answers to my quiz.

Before going on to your bonus question to me, I have a question over one of your answers. For your answer to question one, you state "Joseph Wright (not Adam Eckfeldt)" as the designer of the 1793 half cent. I have always agreed with the thought that the designer is unknown and that strong evidence points to Adam Eckfeldt. I am interested in your arguements for Joseph Wright and against Adam Eckfeldt.

And now, on to your bonus question to me. After some thought, I may be way out of line but have come up with the following. One of the two coins is probably the 1837 half cent token (Low 49) which is actually a Hard Times Token. The second is most likely one of the two Copper Nickel half cent patterns, either 1854 J-155 (R-8) or 1856 J-177 (R-5).

I would be very interested in hearing your response to these positions. You have my word that I will not submit either of these to P-W (or any other publication) without first receiving your written authorization. Thanks again.

Sincerely,

Mark Borckardt

Dear Mark:

Thank you very much for letting me examine this coin and compare it with my own. It turns out that I do have a specimen with exactly the same reverse die state, so I am returning yours.

In fact, I also have a specimen of 1803 C3 with this same state of the reverse die. It was used in both years. The late state on the 1803 certainly confirms that the 1803 dated obverse was reused in 1804, after many of the 1804 Cls had been struck.

Sincerely,

me
